

the German Verband Holsteiner horses have come a long way since 30 years ago and like to use frozen semen from the best present day top stallions from Germany. Still David had some great horses to show. Compared with our NZ Holsteiner / Thoroughbred horses you can see the difference, particularly in the shape of the hind quarters – you can see the touch of Arab there. His horses can jump with the best however and there was much of Olympic potential to be seen at the sale.

Questions?

E-Mail them to Clare at denisf@xtra.co.nz

They will be answered on this page or directly if you prefer.

Question from CM. Clare, did you buy any horses at David's sale?

Answer from Clare. No, but there were some very good buys to be had for those in the market.

Question from PF. Awesome Video Clare! The Sport horse breeding industry is going to have to lift their game to keep up. That Foxtrot – was that really her second time down the free jumping lane?

Answer from Clare. Thanks for the feed back on the DVD. Yes, Froxtrot is only 2 years old . Prior to the open day she had only actually jumped down the lane twice. I teach them to go down the lane with poles on the ground until they are well established with the lane, then I introduce small jumps. She is athletic, really knows what she is doing and has a great mind. :))
